THE MYSTERY OF THE  
ULTIMATE RECREATIONAL VEHICLE

# SOLVED AT LAST

by Niesmann Bishoff, N.A.

The mystery is solved. The ultimate recreational vehicle has finally arrived. Combining the comfort and convenience of American ingenuity with the style and dependability of German automotive engineering, the Clou Liner 3800 offers a new level of quality to the American motor home market.

The Clou Liner 3800 is the product of an American-German partnership. It began with a Texas RV dealer's European vacation. With 30 years in the RV industry, the Ayres family are firm believers in their product. They know the added pleasure and comfort RV travel contributes to a vacation. They wanted to experience Europe in an RV.

With the instincts of an experienced RV dealer, the Ayres sought out Europe's finest motor home. The product they found and used brought some surprises, a level of quality and style never seen in an American RV. They knew American motor home buyers would appreciate these features. The Ayres' desire to share the excitement of this experience was the motivation for the development of the Clou Liner 3800.

The Clou Liner 3800 is the product of the Ayres family and Niesmann Bishoff Motor Homes of Koblenz, West Germany. Niesmann built an extended, 38 foot luxury version of their internationally patented and lifetime warranted body on a chassis manufactured to United States specifications. This world-reknown M-A-N chassis features an air suspension and braking system which includes the third axle. You are assured the roadability and handling qualities of Europe's finest busses.

The Clou Liner 3800 is more than a home on wheels, it's also a garage on wheels. The smaller European prototype was designed to hold a small 2-Seat Runabout. The Ayres

saw that by lengthening the body and moving the garage entry to the rear of the vehicle, they could solve a major problem for American RV owners. In the Clou Liner 3800, your small car travels with you—*inside* your RV. You'll never experience the worry and inconvenience of towing a car. With your car clean, dry and safe inside the Clou Liner's garage, handling and mobility are never impaired; backing your motor home is never a problem. Your car is there, whenever you need it, ready for a sight-seeing trip or a "night on the town!"

When you take your Clou Liner on the road, you'll appreciate the care that has gone into its design. Constructed to withstand harsh European winters, the Clou Liner is probably the best-insulated motor home you'll ever see. Windows are laminated Thermopan® safety glass, equipped with unique adjustable roller blinds for privacy and safety. The extra-large, solar tinted windshield is fitted with a motorized, foam-insulated roller shutter to provide protection against sun and extreme temperatures, and complete privacy for the interior of the home.

The Clou Liner lets you bring along everything you need to have a good time. Closet and storage space will more than hold your vacation wardrobe, and the unique garage can accommodate your hobby needs. Whatever you want to take along, the Clou Liner has the space to let you pack in the fun. The Clou Liner's roof can be used as a sun deck, or to carry even more vacation gear.

With the Clou Liner 3800, you can enjoy motor home travel at its finest, with more comfort, more convenience, more storage space than you ever imagined, the Clou Liner 3800 is the ultimate recreational vehicle.

The Clou Liner 3800 makes getting there even more enjoyable. Hydraulically suspended driver and front passenger swivel recliners have adjustable arm rests, back rests, and seat levels for relaxed and fatigue-free driving. A roller blind/visor allows for easy adjustments while driving, to shade your vision from direct sunlight.

Living area floor plans are custom designed to make efficient use of space and meet your individual needs. Each Clou Liner interior is finished to exacting specifications with the finest materials, insuring your comfort and safety.

Advanced technology is evident throughout the Clou Liner. A monitor panel in the entrance area provides an instant survey of over 40 technical functions. With the push of a button, you can check your generator, battery charge and voltage input, inside and outside temperatures and relative humidity. The monitor panel includes a water pump switch, gas warning system, low tire monitor, antenna amplifier, anti-freeze protection test, and a test center for the electrical system.

The Clou Liner is designed for easy maintenance. Important technical components are easily reached for service. The smooth, seamless aluminum outer skin is easy to clean and protected by a limited lifetime warranty against corrosion caused by electrolysis. Upholstery is removable, and interior wall coverings are washable, anti-static, and Teflon®-coated to resist stains and dirt.

It's easy to prepare quick and easy, or leisurely and elegant meals in Clou Liner's efficient kitchen. You'll feel at home with a 10 cubic foot refrigerator with separate freezer, a microwave/convection oven, a four-element Ceran® ceramic cooking surface with two keep-warm burners, and large built-in cabinets.

Clou Liner comfort continues in bathroom conveniences. A large shower with deep tub (ideal for hand washables) has a sturdy folding enclosure, the separate toilet room has a quality freshwater toilet, and lavatory. An extra sink, cleverly disguised under the bedroom's lift-up vanity, provides added convenience.

The Clou Liner's roomy bedroom holds a queen-size bed, with plenty of closet and drawer space. A drawer chest at the foot of the bed is equipped with a television and VCR.

All of the interior furnishing and cabinet pulls are designed for safety with rounded corners and secure, screwed and bolted construction.

You'll never have to worry about hotel reservations, airline luggage limitations, car rentals, or towing a car again. When you travel in a Clou Liner 3800, you will always have your own self-sufficient 5-star hotel suite and parking garage with all the comforts of home. Amidst beautiful natural surroundings, with all the room you need to bring along everything it takes to make a vacation fun, there's no better way to travel than in your Clou Liner 3800.

# Clou Liner®

## CHASSIS AND MECHANICAL

Custom M-A-N chassis model 9.170 FOC-563  
M-A-N 6 cylinder inline turbocharged diesel  
Allison 4-speed automatic transmission model AT545  
Air suspension with pneumatic independent leveling  
Air braking system  
Second rear axle with air suspension and brake system  
Michelin steel belted tires  
Power steering  
Cruise control  
Impact resistant body group with integrated bumpers  
Adjustable hydraulic floating cockpit seats  
Perimeter outside lighting  
12-volt system kill switch  
40 function monitor panel including inside/outside digital thermometer, relative humidity indicator and LP gas alarm  
Abundant outside storage

## LIVING AND CONVENIENCE

Internationally patented\* body with lifetime limited warranty  
Thermopan® windows  
Panoramic one-piece front windshield  
Insulated windshield motorized roller blind  
Pneumatic lighted entrance step

Screen/blind window rollos  
Fluorescent lighting throughout  
High-back recliner seating  
Walk-through bath with dressing area  
Private toilet room with lavatory  
Convertible vanity in master bedroom  
Heated queen-size bed  
Passive hot water heating system  
Dual Blaupunkt stereo systems  
Grundig 13 inch color remote TV  
VCR and additional TV in master bedroom  
Park cable TV connection  
Motorized awning with automatic rain watcher

## APPLIANCES AND EQUIPMENT

Ceran® ceramic cooking surface  
Carousel convection microwave  
Dometic 240 liter double door refrigerator  
— electronic ignition  
Auxillary LP heating  
Dual air conditioning system  
Dual central vacuum system  
6.5 KW Onan LP generator / 7.5 KW diesel generator  
CCTV system back up  
Computerized hydraulic leveling system  
Garage with motorized winch system and ramps  
Pneumatic garage door locks  
Insulated and heated water and waste tanks  
Push-button pneumatic holding tank valves  
Deep European-style shower tub  
Folding ladder in garage

## SYSTEMS CAPACITIES AND SPECIFICATIONS

Diesel fuel capacity — 500 liters (132 gal US)  
Fresh water — 420 liters (111 gal US)  
Grey water holding tank — 200 liters (53 gal US)  
Black water holding tank — 200 liters (53 gal US)  
LP tank — 39 gal US (156 lbs)  
Dual 220 amp coach batteries with solar charger  
50 amp power cord  
40 amp power convertor

Bullet-resistant security vehicles are available.
